SUMMARY

- Senior Backend Engineer with 7+ years of expertise in architecting high-performance, scalable microservices using Java, Spring Boot, and AWS.
- Proven track record in designing event-driven systems and leading teams to deliver mission-critical solutions that optimize operational efficiency and reduce processing time.

TECHNICAL SKILLS

- **Languages:** Java, Python
- **Frameworks:** Spring Boot, Spring Data JPA, Spring Security, Activiti BPMN
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, SQS, SNS, CloudFormation, IAM, CloudWatch, CodePipeline)
- **Databases:** PostgreSQL, DynamoDB, Redis
- **Tools:** Git, Postman, IntelliJ IDEA, Jira, VS Code, Linux (Ubuntu)
- **Concepts:** Microservices Architecture, RESTful APIs, Asynchronous Processing, Agile Development

EXPERIENCE (7 years)

Credit Saison India Pvt Ltd

Lead Software Engineer

Bangalore

June 2021 to Present

- Designed and maintained scalable microservices using Spring Boot, deployed through AWS CloudFormation and CodePipeline.
- Built an automated workflow engine using Activiti BPMN to orchestrate KYC and document verification processes across multiple services.
- Implemented event-driven architecture using AWS SQS and Lambda, processing 1M+ events per month for asynchronous workflows.
- Developed a KYC Match Engine microservice for applicant validation across multiple data sources, reducing onboarding processing time by 25%.
- Built resilient REST APIs and microservice communication patterns ensuring scalability and fault tolerance.
- Mentored 3 junior engineers, conducted architecture reviews, and improved code quality through structured code reviews.
- Hands-on with AWS services including EC2, S3, CloudWatch, IAM, RDS, and Step Functions.

Tata Consultancy Services Pvt Ltd

Application Developer

Hyderabad

June 2019 to June 2021

- Designed and implemented RESTful microservices using Spring Boot, integrating with external enterprise systems and relational databases.
- Built backend modules following microservices architecture and REST API design principles.
- Deployed Docker-based containerized applications and managed Linux environments for application hosting.
- Automated log analysis and monitoring scripts, reducing debugging and incident resolution time.
- Mentored junior developers in Java debugging, Spring Boot development, and backend design practices.

INTERNSHIP

LinuxWorld Informatics Pvt Ltd

Providing Cloud Services

Jaipur

2 Months

- Built SaaS & PaaS environments using Docker and Python-CGI.
- Developed lightweight containerized solutions for basic cloud apps.

PROJECTS

- **Banking System in Python** – Built a CLI-based banking system simulator supporting transactions, balance tracking, and account operations.
- **Online Code Compiler** – Developed a Docker-based secure code execution platform enabling containerized compilation and execution of user code.

EDUCATION

- B.Tech, Computer Science Engineering, 67%, JNTUH College of Engineering Jagital, 2019
- 12th Grade, 96.2%, TSBIIE, 2015
- 10th Grade, 9.5 GPA, SSC, 2013
